

Volumizer Maintenance Guidelines

CARE + MAINTENANCE

BRUSH
CLEANSE
CARE
STYLE

WE STRIVE FOR AN OPTIMUM WEARING EXPERIENCE.
THE RECOMMENDATIONS IN THIS GUIDE ARE MADE TO HELP YOU
ACHIEVE THIS AND FEEL CONFIDENT ABOUT HOW TO HANDLE
YOUR VOLUMIZER.

Daily

- Brush at least 2x a day and support the Volumizer with one hand while brushing with the other hand.
- Do not use brushes with only steel, wooden or plastic pins.

Cleansing

- Brush out all tangles before cleansing.
- Wet your hair under the shower with soft water pressure. Never cleanse the Volumizer upside down or in a sink.
- Use a low sulfate shampoo and conditioner on Volumizer hair.

Steps:

1. Disperse a small amount of shampoo in the palm of your hands and rub them together.
2. Apply shampoo gently, as close to the scalp as possible.
3. Massage hair and scalp in small circles.
4. Avoid aggressive rotation.
5. If the shampoo does not foam the first time, do not apply more shampoo.
6. Rinse first shampoo thoroughly and then reapply a small amount of shampoo for a second cleansing.

Conditioning

- Dispense a small amount of conditioner into the palms of your hands and emulsify.
- Apply the conditioner onto your hair from mid-shaft to the ends.
- Comb the conditioner through your wet hair with your fingers.
- Do not apply conditioner on or through the Volumizer base.
- Finish with thorough rinsing.
- Blot your hair dry after rinsing. First with a cloth towel, then with paper towels.
- Squeeze gently.
- When excess water has been removed, begin brushing from ends to scalp.

Brushing + Styling

After cleansing + conditioning:

- Brush your Volumizer into the desired shape and allow to dry naturally - or -
- Dry your hair with a hair dryer and a diffuser. The diffuser will keep the natural movement of the hair, making sure it is not blown in all directions by the strong air flow.
- Another option is to blow dry the hair with the recommended flat bristle brush without the use of excessive tension on the Volumizer. Begin brushing and drying from the ends first, then proceed upwards.
- Flat irons and heated rollers are allowed; not above 350°.

DON'T

- Never brush or dry your Volumizer upside down.
- DO NOT go to bed with a wet Volumizer.
- NEVER wear a swimming cap, as the lapping action of the water can get beneath the cap and cause matting.
- NO DIVING WHATSOEVER.
- It is not recommended to expose the Volumizer to high wind situations (motorcycles, fast boats, etc.) without covering your head with a scarf or hat.
- Never attempt to remove the Volumizer yourself.
- Try to keep your head out of the water when swimming.
- Never hold straightening irons or curling tongs still in your hair; always keep hot styling tools moving.

DO

- Visit your stylist every 4-5 weeks.
- Condition often to maintain high-lift blonds.
- If you have a scalp condition, please consult your stylist for personalized recommendations.
- Use a ceramic hair straightening iron or a hair dryer along with your brush to smooth your hair. (Keep hot styling tools moving.)
- Heated or setting rollers, steam rollers and hot air curling tongs are allowed.
- After swimming in chlorinated or sea water, rinse immediately. Apply conditioner from mid-shaft to the ends of your hair. Begin brushing at the ends and work your way up to the base.
- Always have your hair stylist remove your Volumizer.
- Use a hair dryer with a diffuser to activate curls.

**If you are in doubt whether you can use a tool or not,
please contact your hair stylist.**
